SPEAKER PROFILE / ENGLISH

Ivan Koroteev

AI keynote speaker and software engineer

I give talks and lead workshops for conferences, companies and universities. I’m a Bauman Moscow State Technical University alumnus, TEDx speaker and AI educator with over 13 years in IT and more than 50 public talks.

Talks and workshops

Practical AI adoption. Find workflows worth improving, design human review and measure the results of a pilot.

AI filmmaking. Move from a story idea to a sequence of shots, generated motion and an edit.

AI music and culture. Use the example of a 22-song, 15-language Abu Dhabi album to discuss creative and cultural choices.

Speaking for engineers. Explain an architecture decision, deliver a product demo or prepare a technical talk.

AI and human agency. Explore how platforms and generative tools shape attention, creativity and choice.

Formats and languages

30–60 minute keynotes, 60–90 minute interactive talks and hands-on workshops. English or Russian, in person or online. For engineering teams, options range from a 90-minute introduction to a four-week programme.

Selected work

TED.com talk · IBS Training instructor profile · Khaleej Times feature
